A utility to allow for the control over modems connect to the internet through a COM port interface. It allows for a serial port connection to be used for controlling the modem. It is included with a number of COM port based modems that we have developed. Armenians from around the world came to Yerevan to celebrate the ancient Oriental Orthodox faith, for the centenary of the Great Martyr Hovhannes the Great. Some of them visited the Armenian museum of Nersisyan village to take a look at what they have been told about by their grandparents and their parents: the history of this village and the land it lies on. Veselin Baloyan from Geneva said he had heard of the village from his grandparents, but had never visited it. "I know it was here and that it belonged to the Khazar [Byzantine] Church. Most of the local people here were Christians as well, but the land belonged to the Princely Principality of Armenia and the church was built here to honour the memory of the Prince. So there was a church here and a prison as well," he said. As they looked at the collection of tools
