I have been looking for a guide to create a roblox dll for about 2 years now; I didn't come up with anything. Now is the time to ask. Anyone remember how to make a roblox DLL in Visual Basic 6.0? I'm using Visual Studio 2005 Express Edition because I need Visual Basic to create the DLL. I didn't find anything useful even though I searched a lot. I read that the Roblox Visual Basic DLL SDK requires Microsoft Visual Studio 2008 or later so I can't get it to work.
