The real issue is that the demo is a up dated version of the game. With so many additions and updates this really should be a free to play game. So for everyone who wants the info and the demo, get it and stick it on ps3/360 and have fun! I dont think its a good idea to take the first page of new content for a game and make it free (please see the story for my reasons why). I hope they look at it and realize what they did and maybe run it by a writer to maybe make it a little less risibly predictable. You can download it from the Xplosiv website. Just click on the download link on the front page of the site, enter your PIV account details (all the same as your ps3 member account details), enter your PIV password and download the day 1 update. I have the real XPRIZE on both my 360 and PS3 but the only way to get the demo (if you haven't had it before) is from the 10th anniversary july update page. Then you need to register with PIV to download. Wonderfully

Aruna is a short, beautiful and fast-paced 2D platform adventure game with permadeath. Discover a world where the mountains are talking to the sea. It is a pretty place, but it has been corrupted. A catastrophe has rocked the balance and has now placed all of the human souls in danger. An ancient god has reawakened and wants to destroy us once and for all. The matter that takes you to the top of the mountain to find the truth is a quest as difficult as it is beautiful. Aruna will take you through many landscapes, while at the same time plunging you in the deepest possible dungeons, into an extremely mysterious world. Discover the truth about the children of the land and be part of the events that will shape the future of the world. Run, jump, collect and fight in a mysterious world Head towards a mysterious mountain and uncover the mystery Avoid the dark perils of your decadent world Learn about the sacred mission that is given to you Created by: Manuel Rosa, Picha Q: How to test a synchronized code? I have a class which I believe is not threadsafe. Does the following pseudo code behave as intended? What does a thread enter and exit the code block at some point during the execution?

```
final class SomeClass{ synchronized { while (true) { if(someCondition) { if (anotherCondition) { doSomething(); } } } } }
```

 A: The code as presented does not need synchronization, since we're only performing operations on the single object someCondition. If you attempt to access someCondition inside the synchronized block, then the only threads that will be allowed in the synchronized block are those that have already acquired a lock on someCondition. To make the code safe against concurrent access you would need to synchronize c9d1549cdd

Dark World Mode Guide - Picking Armello Characters This is a guide to help you to pick the Armello Character you want to play with in Dark World mode, this then will give you a list of skills to try to stack as many of your favourite skills in one weapon to hopefully get the most damage possible. **WARFARE - HORSE Warfare - Horse** is one of the strongest fighters in Armello and his skills are not as useful in this mode as they would be in any other mode so just stick with Armello Warrior or Valkyrie. **Armello Warrior: Warhead (Heavy Attack):** deals high amounts of damage with a success chance of killing a soldier and defeating a Horse enemy. **Warhead (Barrel Toss):** deals high amounts of damage and is the only skill that will always launch your hand cannon, for example if you want to launch it sideways you will have to delay it just a little for it to then launch the cannon. **Warhead (Great Blow):** allows you to also strike an enemy soldier making it perfect for rocket launchers. **Warhead (Mane Attack):** deals only a small amount of damage but forces an enemy to retreat making it great for planting seeds you can later detonate to destroy their fortifications for example. **Armadillo Weaponsmith: Horse: Warbow (Rapid Shot):** the permanent war bow deals small amounts of damage but launches the arrow very quickly. **Warbow (Hag's Knot):** gains more damage over time than the warbow but launches a few seconds later than the normal bow. **Trident: War Bow (Hag's Knot):** As above but deals more damage but launches a little later. **War Bow (Rapid Shot):** Launches at a longer distance and deals much more damage than the normal war bow. **War Bow (Great Blow):** Has a low success rate, but deals a lot of damage. **War Bow (Ventral Attack):** Helps reload your weapon. **War Bow (Piranha Strike):** Undeterred by resistance. **War Bow (Ventral Attack):** As above but sends the projectile backwards. **War Bow (Chord Strike):** As above, but is charged by your current reserve rate. **War Bow (Steady Shot):** As above, but has a lower success rate and deals less damage,

however it is
