Colibri Browser, is a simple web browser for Windows. It drops "tabs" and other non-essential features to give you a smooth web browsing experience. So, what are you waiting for? Download Colibri Browser now. This is a very easy browser to use. Even as a Windows 8 user, it is very smooth and responsive. I tested it on my Surface Pro, and even on my laptop it was seamless. It does not get in the way of the UI. I don't see much difference

---

between this browser and the default Windows 8 browser, except that this one does not work with sites hosted on Google/Gmail. Hopefully, this will be rectified in an update. The only real downside is that there is no way to move tabs to any other window that you have open. You can only move them to the one currently open. This is not really a deal breaker though, because you can't move them in the other browsers, either, and I would have assumed that this would be fixed before it was released.

---

I have also noticed that it doesn't seem to load pages as fast as other browsers. It's really fairly quick though. It doesn't load a whole lot faster than Chrome or Internet Explorer. Colibri Browser

Overall, the browser is very responsive and easy to navigate. It has a clean, modern look with minimal fuss and a simplicity of the layout which is very easy to understand. Colibri Browser is a must-have browser for people who spend most of their time on the internet

---

through Facebook, Google and Internet Explorer. Colibri Browser has the best tab management as well as super clean and simple interface. This is one of the best internet browsers for Windows. Colibri Browser has one very sharp reason to be given its title of Colibri. It is because they've made the browser as such that it is quite simple to use and navigate. You will have it on the very top place on your system's Internet Explorer. Colibri Browser is a clean and simple web browser that has been

---

designed to be fast and efficient. Colibri Browser is a clean and extremely fast browser for Windows. It has a clean and very intuitive interface. Colibri Browser is a new web browser made by Colibri in order to be a much better web browser than all the other browsers which already exist. Colibri Browser is one of the best alternatives to the Internet Explorer browser. Colib
