Easy-to-use mixing controls, wireless supports, multi-track recording and virtual sound checking with no band required are just some of the reasons why PreSonus StudioLive is a highly appreciated mixer. Then again, let us not forget that one of the arguments used against digital mixers resides in the fact that you need to have a solid knowledge of how to manage the sound. The highlight of StudioLive is the fact that it provides you with all the settings and controls you need for a distinct channel in one location. To put it simply, you can manage and monitor via LED displays for relevant sound data, such as panning, high-pass filters, gating, limiter, output assignments, stereo linking, so on and so forth. PreSonus Universal Control Torrent Download is an application that can help you chain up the recording devices

in an uncomplicated and intuitive matter. More exactly, the utility is designed to lend you a hand with properly mapping the WDM channels to the corresponding devices. On a side note, the program used to come bundled with the FireStudio Interfaces devices, a professional recording system that unfortunately has been discontinued. Upon launch, the app solely enables you to set a handful of features, namely the sample rate, clock source, safe mode and the buffer size. Then again, you should keep in mind that the idea behind the application is to provide you with an easy way to use any device as the master clock source and hence, slave the entire chain to an external digital device. Vista/Win 7/8/10 compatible. Legal disclaimer: The software is as shown in the pictures. If you get the software with any other configuration, label or settings, that's not the software in the pictures. Windows Every PC user is familiar with Windows, which makes it easy to install the app. The developers provide a ready-to-go setup file for you. Just execute the executable and it'll detect your FireStudio interface for audio source and it'll automatically set the corresponding device to the master. How to Install SoundMixer: Unzip the downloaded file. Double-click the SoundMixer_setup.exe to install the software. Tip: To add a password to the SoundMixer, go to the Security tab and create a new account. You can now choose the password you want, so that no one can get access to your PC if they get your user name and password. Open SoundMixer, and choose Switch back to Default Audio Hardware. Part 5: Adjust the Video PreSonus MixPad Video HD is the first HD video recording software that has been released as a companion tool for the FireStudio Interfaces. The system was developed by PreSonus and it allows you to capture audio and video directly from the FireStudio Interfaces. By doing so, it saves you the hassle of using a separate screen capture utility and an external video source. That said, MixPad Video HD can be used to monitor, edit, and preview your mix. Furthermore, it can record and edit audio and video using its feature-packed user interface. On top of that, MixPad Video HD uses simple interface to lets you play back or edit your videos. Therefore, even the most novice user can easily import and export files. Not only that, MixPad Video HD can record your stream and stream it back, perfect for live broadcasting or recording webcast live streaming. SoundMixer gives you the best live mixing experience, while MixPad Video HD lets you play back your video with a professional quality, which no other video screencast software can bring to you. As you can see, the application has a simple and user-friendly interface. The interface is intuitive, plus it allows you to easily access features, start-up and shutdown options. Moreover, to provide an interface-free setup process, the application is completely independent from other applications.

PreSonus Universal Control helps you to select the audio source on your system, and then, to playback and record from that source. The control for PC recording or streaming audio is coupled with the power of the Windows operating system. Stream or record to your PC using software in the same way you would record audio from an analog source: Create Channel Groups and Routing with snap. Save and load channel configurations. Channel switches are synched to changes made on Windows. Record and control audio from multiple sources and/or devices simultaneously. Easily record from one device to multiple channels and destinations using reverb, delay, and noise reduction. Select the device for

capturing and playback. Change the recording profile and adjust audio settings to match the workflow. The application thus permits you to send sounds to multiple destinations, including your recording device. Further capabilities include a delay, reverb, or noise reduction effect. You can assign multiple devices to the same destination, thereby getting your desired settings. Studio Manager: From the icon menu, you can choose from the main unit, a speaker, or the microphone on your PC, which of them you want the designated channel to be controlled by. Studio Manager is an all-in-one software application for monitoring your recording or streaming sessions. It includes a graphical user interface (GUI) and can control the two groups, an external audio processor, and a streaming server. Studio Manager has unlimited trigger capabilities and a number of categories and sub-categories, including: Recording Playback Remote control Digital audio Workstation "My Studio" An Audio Processor You can choose to include or exclude some of the options by selecting the buttons on the left side of the window. You can even enable a tutorial or add a trigger if desired. Using the "My Studio" option, you can turn on the monitor by toggling the button on the PC or turn the monitor off by simply clicking on the button on the PC. Using this option, you can bring up the main navigation window. The SoundGrid™ feature allows users to listen to audio being recorded live or over the internet by connecting the Studio Manager to the media server. There is also an option to load the audio to the server by controlling the environment. Studio Manager contains a "dynamic music template." Therefore, Studio Manager offers a number of tools for users to create dynamic projects. The tools include: Note Editor Loop/
