# Simfatic Forms V3.2.1.252

[Download](#)

Simfatic Forms 3.2.1.252 is based on the Prestashop 1.4.2.4. The main difference with the previous version of this tool is that forms are not saved in a table anymore (this is a limitation of HTML5). You still have 2 options :- Simfatic Forms lets you quickly create forms for your web site. You can design the form, add input elements and attach input validations. Simfatic Forms generates all the code just by the press of a button. You don't have to do any programming. All important types of input elements are supported, including file upload box. All important types of input validations are built-in. You can have conditional validations that validate only on certain conditions. For example a text box input is required if a checkbox is selected. The Simfatic form processor script can send the forms submissions to you by email. In addition, you can have the forms submissions data saved to a file on the server that you can download later. You can configure the form processor to send an auto-response to the visitor who submitted the form. Installing the form on your webserver also is equally painless. Simply, by the press of a button you can install the form on your web server. Simfatic Forms can parse out a form from a web page. This way, you will have the possibility to easily add validations or insert form-mail support to any existing forms. This version supports forms with multilingual labels and the language that the labels are set to. Before version 3.2.1.252 Simfatic Forms supported only labels with only english text. You can get your multilingual forms running by simply selecting the language as you see in the chart below.

### Simfatic Forms V3.2.1.252

Another thing that makes Simfatic Forms exceptional is the ability to combine multiple forms into a single page. It doesn't matter how many forms you create - Simfatic Forms will automatically link them all together. Simfatic Forms is relatively new, but it is already one of the most popular forms solutions in the market. It's easy to use and it only needs a few clicks to make a typical form website or blog post. The trial version of Simfatic Forms provides you with a 30-day trial for the application. It shows you how to create a form, as well as how to edit and publish it. The trial version also has a feature that will create a new form based on the templates that you choose in the pre-defined styles. You can add new elements, edit them and delete them. The trial version is free of charge, but you will be required to pay a monthly subscription fee if you wish to use the advanced features of Simfatic Forms. Simfatic Forms was created with the intention of providing web professionals and site owners with a one-stop solution for form creation and publishing. We tried to add all the features that are necessary to make any form ready for publishing. The application has a lot of templates and styles so you can customize a form as you like. Simfatic Forms is a web-based application that you need to install on your web server to use it. First, you will need to register for the trial and make a subscription to access the full functionality of the application. After downloading and installing the application, you need to provide your information and then you will be taken to the application's home screen. 5ec8ef588b
