New Stars & Stripes for the Michigan ECCE Stars and Stripes is intended for upper-intermediate and proficient learners taking the revised for 2021 ECCE and ECPE Michigan exams. Stars & Stripes for the Michigan ECCE New Stars & Stripes for the Michigan ECPE Stars & Stripes is intended for upper-intermediate and proficient learners taking the revised for 2021 ECCE and ECPE Michigan exams. New Stars & Stripes for the Michigan ECCE: SQL Server 2012 (Query) - Copy data from multiple databases into one database I am trying to modify a view I created that has over 1,000 different tables. To make this more efficient, I would like to make a single query that would output the data from these tables into a single table, but I am having a hard time thinking up the query. Here is a sample of the view. select s.emp_first_name,s.emp_last_name,ss.amount,ss.first_name,ss.second_name,ss.city,ss.state,ss.phone, s.emp_phone,ss.phone from emp_source s left join emp_source ss on s.emp_source_id=ss.emp_source_id and s.emp_id=ss.emp_id and ss.proc_id=10000 and ss.ID in (select ss.ID from ss join emp_source_assoc ss1 on ss.id = ss1.emp_source_id where ss1.proc_id='10000') where s.comp_date is not null order by s.emp_id Here is a sample of a table that gets merged.
