Int ZSSS Latest Version -> f40e7c8ce2 New Chinese.

Prepar3d Pilots have a new destination, Beijing Daxing International Airport. A total makeover of the airport, now including the new terminal 3. Q: Why do all these things not work in C? I am an absolute beginner in C. I have a course on it but I still find it difficult to use C. I'm asking because I've been trying to make this program for 2 weeks but I keep getting the same result which is to print out an integer but the values just seem to stay 0. I've tried debugging this and I still can't find what I'm doing wrong. Also, please do explain what all the lines are doing as I really don't understand them.

```
#include <stdio.h>
int main(){ int i = 0; while (1){ i = i + 1;
printf("%d ",i); return 0; } }
```

A: You should have start with declaring and initializing i: `int main(){ int i = 0;` This creates an int variable called i with the value 0. You then increment it: `i++;` This effectively adds 1 to the value of the variable i. You then print the value of i: `printf("%d ",i);` This print the value of i to the console. You return 0 at the end of main to indicate that the program exited successfully. Summary: `// Declare and initialize i int i = 0; // Increment i i++; // Print i printf("%d ",i); // Return 0 return 0;` Image copyright AP

Image caption The F-35's new plane variant, Block 3F, will be tested before it begins the slow process of being built into 13 aircraft Northrop Grumman, the US aerospace giant, has posted its first quarterly loss in nearly six years. The company, which has made many of the world's planes and warships over the past 70 years, said a drop in
