* **The history palette:** Although the Photoshop interface is not necessarily user-friendly, Photoshop does offer some bells and whistles to help you work efficiently, such as visual markers or keyboard shortcut help that point you in the right direction. By using the history palette, you can easily move through the steps you took when you originally set up and altered an image in Photoshop. * **The workspace:** Any Photoshop editor can be divided into two main parts: the workspace and the menus. The workspace offers many options such as **View**, **Image** **Quality**, **Tools**, and **Layers**. You also have the option of closing down Photoshop or keeping it open at all times. Here you work with Photoshop's workspace, which can be altered with modules. * **Images:** A collection of images you have created, loaded from a device or placed on your hard drive. * **Layers:** As mentioned earlier in the chapter, each layer is a presentation of an image. If you drag a layer from the history palette, a new empty layer is created beneath the existing image. This empty layer is used to showcase the layer's effects. After you have all your layers set up, you can work on them individually or layer them together, depending on your project. * **Undo:** All editing takes place in the layers, with no changes on top of the previous layer. This keeps the work one step back or undoable as opposed to deleting or redoing everything. You can use the keyboard shortcuts shown in the following list to control the workspace. The list is also available in the keyboard shortcut help (described earlier in this chapter). To select one of the workspace options, hold down the Ctrl key. To exit Photoshop and return to the normal workspace, hold down the Esc key. * **View:** Click the arrow key to the right of the view option. The screen automatically changes to reflect the new view type and you can then scroll or zoom in and out. You can also drag the guide in the image with your mouse. You can change the view by clicking the arrow in the top left corner of the image window and selecting from the options offered. If you have a screen with several images open at one time, you can scroll the images by using the scroll bar in the top right of the image window. * **Image Quality:** Choose a quality setting from the drop-down list in

Contents show] Interface Edit Despite its small size, Photoshop Elements offers a relatively simple user interface. It is easy to use and has no hidden complexities, as many graphics editing programs have. Features Edit Like its big brother, Photoshop, it supports all the core Photoshop editing tools. This interface combines the best of two worlds: as it is not complex, you can enjoy ease of use, but it is also not too simple, and it is just the right amount. You can edit any type of image, including both raster images and vector images. Both JPEG and TIFF image formats are supported. Many types of layers (sub

The Puppet Warp tool allows you to bend the pixels of an image. You can use the Pen tool to create a wide array of designs and custom features. We'll look at some of the most powerful ones and how to use them to create distinctive images. Photoshop comes with tools that are helpful for tracing and drawing the contours of an image. This is useful when editing an image with layers. These tools will help you easily create a layer mask or correct any overlapping layers. Some other useful tools are discussed in our article about Illustrator. Creating Clones To make a clone, position the clone tool over the object you want to replicate. Use the following steps to create a clone: When you release the mouse button, the image will be copied to the tool's default size. To change the size, right-click on the clone and select a different size. To move the image, hold down the Ctrl key and then click the clone, or use the arrow keys to move. When you need to edit the clone, the image will be visible as a mask. Creating a Layer Mask Layer masks act like a stencil where you can paint the image or select the pixels to exclude. To create a layer mask: Select the Paint Bucket tool. Right-click on an empty area in the image. Click Layer Mask. Select the Brush tool. In the tool options, make sure the soft edge is selected and the radius is set to 0. Paint to the area you want to mask, until you have a mask similar to the example at right. To remove the mask, press Ctrl + D or select the Eraser tool and click on the mask area. To adjust the mask, use the Brush or Pen tools. Tracing Contours Clone Stamp For some images, tracing the contours of an object can be a good way to draw the exact shape of the object. Using the Clone Stamp tool, you can copy pixels from one area of an image to another. For example, you can use the Clone Stamp tool to remove hair from a photo. Draw a simple outline of the object on a new layer, and then select the Clone Stamp tool. To erase a pixel that is being removed, press Ctrl + D. When you are finished erasing the pixels, press Ctrl + D again to hide the layer mask

I.e., things you value and are willing to pay for. First and foremost, unless you are willing to leave a lot of time and effort at home, you will have to make accommodations to help out. Be prepared to trade off values you may place on things at home when you are going out for hours at a time. Plus, consider other items you may need to bring along such as clothes for family, a first aid kit, etc. Also, try to think about and plan for what you may be doing for fun. You may want to plan a special event for your family. Here are some ideas on special events: 1. Potluck. Have everyone bring a dish. The hostess can prepare it in advance or a big pot of left overs and serve it on dishes or at one place. If everyone wants to serve their dish, that's great. If not, then the hostess can serve it to other guests. Let them bring drinks or desserts. Invite family and friends to a potluck. Family members can bring their kids or share in the fun of bringing the food. 2. Picnic. Bring lunch and snacks. Pick a special site. Make a special menu. Try the newest restaurant in town. Bring water and good drinks. Have a great time! Thanks for the PM. A budget that some reasonable allowance in case the kids aren't well behaved? (Just kidding) My husband and I both work, so we're sharing the load around here. I have to transport my kids in my Kia Sportage. There's a lttle getting in and out when it's full. But when the kids are in the back it's pretty spacious. And we have a gas grill in the back also. We can make a little food in there. But I know a lot of people go out and buy goodies for the picnic, so we won't be bringing any. The kiddos love to ride around on my husband's bike, when we take it out of the garage. So that's a gas burner as well. And my
