simple steps: Generating Components You can design a mockup from a template, a template that you have already made and added to your collection. Select which template you would like to use. In this example, we have selected the wireframe with 2 added 3D compartments. Click Generate Adding Components Select the wireframe that was

generated in step 1. From the options available, choose an element to add to the mockup. In this example, we have chosen to add a 3D File tab. Click the 3D component to preview the graphic. Save as this graphic can be saved to the Computer, dragged, and dropped to your library. Click View Options for more information. Adding a Label
