References Category:Accelerator physics Category:Scientific techniques Category:Radiation therapy Category:Quantum effectsEditor's note: The Longmont Times-Call is releasing this story in four parts as space allows. EDITOR'S NOTE: This is part of a series about how incidents at Family Services' office might affect the city budget. This is the third in a series of posts on how the city budget process works and how operations at Family Services' office might affect the city budget. See the others: Vendors are due to renew their contracts with the city in November, but the city won't know whether it's coming year until Family Services' budget for 2018 is closed. There are fewer vendors and contractors involved in the process of providing services at Family Services than the level of service received the past few years, according to the city finance department. "We get a lot of low bids," said Jim Manford, the city's finance director. The city is spending about \$1.1 million on vendors this year, which is about a 10 percent decrease from the previous year. Of that, about \$872,000 was spent on vendors involved in the family and dependent care budget, Manford said. That's about a 26 percent decrease from the prior year. Because there are fewer vendors, the city is able to negotiate a discount on prices. "We've done it with several vendors," Manford said. The average price per family for vendors in the Family Services budget this year is \$10.87 per month, according to information provided by the city. That's an increase from last year's average of \$8.80 per month, according to budget documents. The city paid out a total of about \$6.9 million in the family and dependent care budget this year. That's about a 14 percent increase from the prior year, which saw a \$5.3 million payout for services. The city is also paying out more in family and dependent care funds because it is taking in more in payments, Manford said. Last year, a big increase in the city's income meant the city had more funds to pay out in the family and dependent care budget than in the past. 82138339de
