Buttons, menus, and dialog boxes You use the keyboard to move around PhotoShop, and the menu bar on the top left of the screen shows the menu system for which PhotoShop has many features. Of course, you can invoke the various menus either with the keyboard or the mouse. The cursor, which changes color when over a menu item, is used to select menu items when you see them in the menu bar. The Tool Options dialog box, shown in Figure 3-2, provides a number of ways to resize an image. You can see that by default the Scale option is checked. Click the Change Selection

One of the most important dialog boxes is the Layers dialog box, shown in **Figure 3-3**, which allows you to create, edit, and organize your layers, and allows you to easily manage several images or layers. **Figure 3-3:** The Layers dialog box is very important. What's New in the Photoshop 2021 (Version 22.3)?

Trump Updates the Packet for Biden Inauguration Day We all know what's next. Sure, Trump's inauguration will be beautiful, with fireworks. He will be surrounded by various other celebrities and victims of sexual assault. But after all that, there's always the presidential swearing-in. Trump will give a speech, then Vice President-elect Mike Pence will take the oath of office, and then the fun will begin. Here are some reminders. First up, the oath. The Trump transition team has put out the packet with the oath, just like they did for the inauguration. It contains the text, the background, and even a handy "spelling " template (can you imagine the chaos that would happen if Pence forgot the "e" in "presidency"?). These are the words, and you can find them here. Again, they're mostly easy stuff — swearing to "preserve, protect, and defend the Constitution of the United States." Easy. But it's still an oath, and here's the part that really got me thinking. Three

cherries indicate Trump is "assenting," but if there's more than one, he's really assenting! Then he's swearing to "faithfully execute the Office of President of the United States, and to the best of my ability, preserve, protect and defend the Constitution of the United States." There's more, but this is all you need to know. Or at least enough to understand why I was freaking out before taking the oath: We're unsure if there will be anything for Melania, but she'll definitely want to take advantage of the VIP section in the bleachers. Other things to note: There will be five chandeliers in the Library of Congress on the inaugural platform. Much fanfare, and not a lot of anyone giving a shit. The Kennedy Center, which has never received much more than a passing "what the fuck" from a Trump administration, will host the official ball. The entertainers, choir, and speaker count is officially a who's who of crap we're all sick of hearing about. I'll preface that with the fact that the dance party and ballet, which I actually find rather cool (because you're not sure where it's going, and that's fun), are gone. It'll be just black-tie goth people prancing around (or whatever the fuck that means). ... And
