First and foremost, the new light versions is . FPSC Reloaded v.4.1: here's what's new since April 70th 1. Field of the Invention relates to a device for the manufacture of a plate from a rotating aluminum blank. 2. Description of the Prior Art The device according to DE 34 24 931 A1 is intended for the rolling of blanks or the like. It includes a support stand for the roll over which a pressing body, in the form of a roll, is mounted rotatably. A rotation motor is provided for this pressing body. The rolling of the pressing body makes it possible to assure that a sheet shaped product or plate of a predetermined thickness is rolled out of the blank. However, this takes place at a high pressing force and, consequently, high loads are placed on the bearing or the like, which frequently leads to the problem of a premature failure of the bearing or other components. A shift of position of the pressing body in the roll would result in the roll having to be replaced. For this reason, a device has been proposed, which includes a hydraulic adjusting element and a switching arrangement for the adjustment and, as a function of the position of the pressing body, effects an adjustment of the pressing force. A disadvantage is that an additional adjustment of the pressing force leads to an interruption of the Related Art A digital television (TV) tuner outputs television (TV) channels by receiving a broadcasted radio frequency signal in a satellite, terrestrial,
