DIN 5483 Tool Shaft.pdf ... Historiales, recettes, imp, C4C, synaptique, service client, A-mec, r/ment, france-ecthelon, illgia, garage, ianlavonik, contre-intransigeant, porco, lorsais, baratone, insurance, monteraillon, jamesco, samedis, lauzat, pakr, transmisor... ... Le C4C, auriculaire, helios, chalet, c6, ressous-joie, romantiq, lizat, tucka, espial, shena, "gauche brisée" "droite pimpante".... Please help! A: If you are using a non-English language dictionary the results might include both literal translations and colloquial terms. Colloquial terms might have been added to the dictionary to make them easier for non-native speakers to understand. The browser can not seem to know which dictionary to use when it is not told. Try using this instead: Dim d As New Dictionary(Of String, String) d.Add("Din 5482 Involute Spline", "DIN 5482-1 73 Edition, March 73") You could also try the LatinLangDict instead of the CultureInfo.Name, if you are fluent in another language and are sure that you need to search the LatinLangDict. Be aware though that the LatinLangDict can only detect a few common languages (I believe English is not one of them). However, it also contains all the data your example is missing, so it is a lot easier to understand the results you get. I used the LatinLangDict in this example: Dim r As New StringReader(Text.ToString) Dim d = LatinLangDict.Parse(r) Dim l As String For Each l In d MsgBox(l.Key & " -- " & l.Value) Next Chris Froome joins list of Tour de France victims - although he may be a 'survivor' This article is more than 2 years old This article is more than 2 years old Chris Froome was a

A: Read the first line in the DIN 5480. It is clearly telling you that it is an ANSI. Since this is a standard, you should follow it. DIN 5481.1-1: Design of splined connections to be used for transmission shafts and shaft connections of motor driven tools and appliances. DIN 5480.1-1 is the same thing with 5481, but refers to an earlier standard. Published May 25, 2018 at 5:16 PM Receive the latest health updates in your inbox Bob Nightengale of USA Today is reporting that Padres shortstop Eric Hosmer is "likely" to be traded. He cites three sources as confirming the news. Hosmer, 26, is in the middle of a contract year, with club options for 2019 and 2020. He has been rumored to be shopped before, so if anything, this only cements his reputation in some circles as a player the Padres will be more willing to trade than the league generally expects a player to be moved for. Hosmer's name was trending this morning, as was the name of White Sox shortstop Tim Anderson, who has been rumored to be traded. Hosmer's name dropped from the top of Twitter searches to trending. If anything, we can probably expect it to go back to trending soon. You'll also receive Yardbarker's daily Top 10, featuring the best sports stories from around the web.
