This legendary World War II real-time strategy combines unprecedented realism and accuracy to create breathtaking 3D backgrounds and a game in which brute force often departs to the background. It has also been redesigned and made more user-friendly for new players, with a new interface and tools through which players can create their own wars from their imagination. You will have the opportunity to travel to more than fifty different countries and more than thirty locations. You will fight in places like France, Poland, Italy, Germany and many more. You will fight against enemies such as the Allies, Adolf Hitler and his Nazi empire.
