Have you ever been stuck on a desert island, where nothing but scorpions and soda-pop cans keep you company? Well now you have the chance to step into the shoes of a fearsome bounty hunter who deals with the scum of the planet, in your quest for a bad place to get a good shot. The game is divided into short chapters. Each chapter takes around five minutes to complete, and you have to work your way through 50 of them to achieve the full game. While you are hunting you'll encounter all kinds of colorful characters, weapons, tools and upgrades. In addition, you will get a variety of weapons and ways of taking down your enemies. To help you out, you can find various weapons and equipment in shops you can unlock by collecting coins. Guns: You are starting the game with a pistol and a large revolver, but you can find various weapons during the game. As a bounty hunter, your speciality is to shoot people fast, but the different types of bullets, like a normal one or a light ones, will have an effect on the kind of damage that you do. Attitude: In the game, you are hiding out of your enemies, a bit like in the game Payday: The Heist. You will continuously have to decide whether you want to stay in position and shoot your target or run away. Don't forget to check the vicinity for incoming enemies as well. Bullet Time: Usually, you will see a fair amount of bullets flying at you fast and without notice. But if you aim your gun just right, you will be able to shoot an extra quick one. Action: On this level, you will be taking down three identical enemies at once. First, you have to aim your shots and then line them up on the center, and in the end, you can press the fire button to shoot. You can also press in another direction to shoot twice at once. Enemies: On the Bounty Hunter-level you can find various enemies, ranging from a harmless civilian to armed NPCs to the toughest of them all. The main hero of the game is a bounty hunter, and his main goal is to hunt down the criminals of the game universe and bring them to justice. His environment is spectacular and the game looks really nice. If you're looking for a nice game, this is the one to start with. This game is a blast and you will have a

-Zagu is a spy for the Tracha colonists. (The Tracha colony lies in an alternate version of Azeroth, in the middle of the ocean on the planet of Tracha, and is inhabited by gnomes.) -The player takes control of Zagu when he uses the seven blueprints to form an unbreakable sword called "Zagu". -The player must travel to seven different regions in order to use the seven blueprints to complete the sword. -The player must save Zagu from enemy traps, bosses, and other hazards. -Once the player defeats all enemies, they must find the sunstones hidden in various places, or perish. -The game ends when Zagu wields the Zagu sword and is able to defeat the Rogan emperor. -At this point, Zagu is able to return to Tracha to defeat the emperor and complete the game. Traveling through a vast wasteland, you are the only thing that separates you from total annihilation. That is, as long as you can resist the urge to turn to either violence or cowardice, and keep moving in the right direction. The Last Express (previously known as The Paper Truck) is an episodic Action-Adventure game that is inspired by everything from adventure stories to board games. In it, you play as a courier, delivering packages across a wide-open and sparsely populated wasteland. While this all sounds very epic, The Last Express isn't meant to simply be an over-the-top pastiche of the greats. While there are nods to many classic games, you are also immersed in a story, with over 3,000 line of text cutscenes! Featuring multiple endings, and completely explorable non-linear narrative, this game will keep you coming back for more. Features of the game -A non-linear narrative with over 3,000 line of cutscenes. Every major character and location is entirely explorable, giving you the freedom to look at the world in any order you wish. -Explore a vast open world that will take you to all of the major locations, each with their own unique challenges and enemies. -Multiple difficulty settings and multiple endings. The game has a difficulty gauge, and a system of rewards and risks to make sure you get the most out of your experience. -Choice of Male or Female character -Over 100 voice-overs, animations, and sound effects by professional voice actors. The standard edition is already quite different in comparison to the iOS versions of the games. While the iOS version adds more features, the standard edition adds a lot more the moment you start. Apart from the usual features like friend support and the chat in the background, many single player features can be unlocked as well, including the double character growth feature that is part of the Deluxe Edition. The player can create two characters, a hero and a villain. Each character can be equipped with different equipment, with the villain having a selection of equipment that is best suited for stealthy gameplay. Players can also acquire new equipment and skills. The character itself can be improved, including heightening the fighting stats, and, at the player's option, the sound effects, voice and even personality can be tuned. The heroes base level is on par with a new player and the villain starts at level 5 and requires more hits than the hero to die. While it is easy to defeat heroes, they are very hard to kill unless the player has the right skills. Furthermore, the encounter system is designed to be difficult, and since the player is rewarded with experience points, the player cannot simply stop adventuring. The normal encounter system, in which the players will meet random opponents on the way to the next area, can be turned off and replaced with a good encounter, which will have the player travel the opposite way to the encounter area. The best part of the game is the end of each area, which are, depending on the area, based on classic adventures, such as the Seven Samurai, The Thousand Eyes of Dr. Mabuse, and of course King Arthur. After beating a section, the player is given a rank, depending on how much they performed. For example, if a player had to choose between talking to some of the monsters or killing them, he will be awarded for the former choice. Killing all the monsters at the end of a level rewards the player with a rank on par with earning a Silver Medallion in Medal of Honor. The game is also notable for being completely free and requires no microtransactions. Download it right now and show the RPS crew who's boss! Don't forget to send us a bunch of screenshots in the comments section! (:I've just purchased a Domino 7.2 (P7/P7.5) 5.1 + 6.1 system. Before upgrading, I decided to upgrade to Domino 7.1 using the technical support document and scripts provided with the update
