I am interested in creating a dropdown menu that will allow me to go through a menu and select options that I can then pass into a function. Is this possible with spreadsheet apps? A: I am not familiar with the Android version, but in the Google App Script's Editor, menus and dropdown boxes are created with the dropdown google.script.host.Format. This format is created with Type dropdown. See the Google documentation for a reference. The present invention relates to a new and distinctive soybean variety, designated XB38E13 which has been the result of years of careful breeding and selection as part of a soybean breeding program. There are numerous steps in the development of any novel, desirable plant germplasm. Plant breeding begins with the analysis and definition of problems and weaknesses of the current germplasm, the establishment of program goals, and the definition of specific breeding objectives. The next step is selection of germplasm that possess the traits to meet the program goals. The goal is to combine in a single variety an improved combination of desirable traits from the parental germplasm. These important traits may include but are not limited to higher seed
