The management of intracranial aneurysms has evolved with the development of endovascular and surgical techniques. Advances in the diagnosis of aneurysms have led to the development of strategies for medical and surgical therapy. Determination of the mode of therapy to employ, based on the age and other factors of the patient and the characteristics of the aneurysm, is necessary. The management of ruptured aneurysms requires a multidisciplinary approach that involves a broad group of medical and surgical specialties. Advances in the surgical techniques of clipping and endovascular therapy have led to an increased interest in the treatment of subarachnoid hemorrhage from unruptured aneurysms.Nipple Shields Nipple Shields was an American R&B band formed in Chicago, Illinois in the 1970s.
