GRANITE  
RIDGE, Colo. — Children at an  
elementary school in Colorado  
were waiting for the bus

Wednesday afternoon when a  
woman stood up on the sidewalk  
and grabbed a boy. It happened at  
Granite Ridge Elementary School  
in Granite in the Jefferson County

---

suburb of Golden. According to school officials, the boy, who was walking to the bus with his dad, was distracted by the woman and she “intercepted” the boy. A photo of the woman being detained by an officer, along with the boy, was captured on video and posted on the school’s Facebook page.

Granite Police said they’re investigating the incident, which happened shortly after 2 p.m.

Q: How to bind a list of strings to a list of string values? I have a string list which has values "a", "b", "c" and "d". How to bind this list to a list which has values "a", "b", "c", "d"

A: You could use the `Tuple.Item()` method to get a

---

specific item from a list. Here, you would use `Item(0)` to get the first item in the list:

```
var list = new List()
{ "a", "b", "c", "d" };
var values =
new List() { "a", "b", "c", "d" };
var result = list.Select(item =>
values.FirstOrDefault(value =>
value == item));
```

A: I think this could be done with Linq and could be simpler: [ca3bfb1094](#)

**What's New In AutoCAD?**

Styling for groups: Apply custom

formatting to any AutoCAD group of objects. You can modify text styles, orientation, and even highlight properties. (video: 1:30 min.)

Optimized CAD preview: Preview an entire drawing or a single object. AutoCAD 2023 supports the ability to view multiple files at once. This also helps with collaboration and editing—you can work on two designs at once without worrying about conflicts. (video: 2:30 min.)

Improved Topology: Paint, extrude, and other topology tools give you more control over your design. The 3D command palette now includes a Toggle Mass and Torque option for increased control over your

topology. (video: 1:15 min.)  
Overview: AutoCAD is your workhorse for 2D drafting, engineering, and visualization. And with new powerful tools, it lets you get your work done faster and more accurately. Futurists are not, on the whole, a pessimistic bunch. The grim state of the world is something we live with and try to address through methods that keep us calm and level-headed. Mostly, we're just trying to stay alive. When contemplating the future of our species, however, many people think things like this: Futurists have a whole lot of work to do. This is very wrong. What follows is a set of six predictions of

---

the future of humanity, culled from futurists, science fiction writers, futurologists, and scientists. 1. Humans Will Start Leaving Earth in Large Numbers There is nothing wrong with wanting to live on Earth forever. “If you’re born in the future, you are about as likely to live to 200 as you are to win the lottery.” – Nick Bostrom Even the most optimistic of futurists agree on this one: Humans will eventually stop living on Earth. That day will likely be at the tail end of the 21st century. As Bostrom puts it, people will stop living on Earth “when the first several billion people are sufficiently satisfied with their

---

circumstances on other planets, that the remaining billions will be able to arrange their affairs in a way that would allow them to be voluntarily transported elsewhere.” 2. Everyone Will Own an AR/VR Device by 2045 In 1965
