Developed by renowned studio EA Redwood Shores, FIFA 20 will feature an array of new features, including: Goalkeepers Goalkeepers are designed to give you control over your penalty area with an all-new control scheme, low block, and tactical GKSM controls – so you can take your penalty-taking game to the next level. A new Throws system is included, allowing you to craft a perfect long range shot. New goalkeeper equipment allows you to express your leadership style with a range of player faces, based on the roles your kit gives you. For example, the goalkeeper equipment provides a different face for a leader or a nervous guard. Goals Move around the goal like never before and dominate your opposition. FIFA 20 offers the most authentic goalkeeper animation of all time, with player flexibility, anticipatory goalkeeping and reactive anticipation movements, with beautiful 3D animated animations, flowing ball physics, camera transitions, goalkeepers making dynamic reactive saves on the ground and extending themselves into the air. Player Equipment From a multitude of clothing styles that help you look the part on the pitch, to new goalkeeper equipment, to a range of post-match reactions, there's an extensive amount of player equipment to choose from in FIFA 20. Choose from a range of core, t-shirt, leggings, shorts and goalkeeper gloves with unique player faces. Whatever your style, there's an apparel option to fit your personality. Team Building Create the team you want on the pitch with customizable team kits, ball physics, a new club-based player progression system, all new and improved transfers and a massive range of player faces. There are more than 36,000 new player faces for you to choose from across 17 clubs and over 3,400 player faces across all leagues. AI and Behaviour The world's most realistic AI has been enhanced to offer an increased ability to read the game. Now the likes of Barcelona will react to ball velocity and trickery. The intelligent AI performs smarter and more precisely, reacting to players and making decisions based on intelligence and experience. Improved rules engine supports over 500 on-pitch behaviours to interact with opponents, teammates, referees and objects. Evolution and Goals New Seasons bring new challenges and rewards. Improved game logic and behaviour allows you to compete in every month of the year. Now there

Field of the Invention The present invention relates to an image processing apparatus, an image processing method, and a computer-readable recording medium. 2. Description of the Related Art An image processing apparatus includes a region where there is a possibility that another image is superimposed on an image to be processed. For example, a region where there is a possibility that another image is superimposed on an image to be processed when the user clicks the image processing apparatus or performs other operation on the image processing apparatus. An image processing apparatus with which the user performs an operation on a region where an image processing apparatus is displayed is referred to as an operation-target image processing apparatus hereinafter. When an operation is performed on such an operation-target image processing apparatus, the user may carelessly perform an operation on the operation-target image processing apparatus while changing settings or operating the image processing apparatus to determine the settings. For example, the user may click the operation-target image processing apparatus while determining the settings. When a display is performed on the operation-target image processing apparatus while changing the settings, an image to be displayed on the display may be modified by the user performing an operation on the operation-target image processing apparatus. For example, when there are multiple settings for an image processing apparatus, the user can repeatedly perform an operation on the operation-target image processing apparatus to view a screen and determine a setting, for example, with the state of the operation-target image processing apparatus as a reference. According to the above-described method, the user may click the operation-target image processing apparatus repeatedly while viewing the display on the operation-target image processing apparatus. Thus, there is a possibility that an operation on a region of the operation-target
