## **What's new in Fifa 22:**

- **Create the new club in FIFA. We are no longer only focusing on improving player and manager experience. We have another goal in mind, one that's pretty ambitious: Be the only game to capture and use motion capture data, from real-life players! After extended testing and a lot of player feedback and data collection work, we can now bring this element to Ultimate Team. We've captured more than 40km of player movement, plus accurate goals, saves, and tackles. We have created our version of the players' step-by-step movements.**
- **Be the GQ of your playground! Now, when in-game challenges are kicked off, don't you just want a bigger piece of the action? Thanks to a global update, challenges make the game more challenge-based, but also fun for you, the player. Crew up with your friends, and stay on top of the competition.**
- **Whirlwind chase! Better defenders, chase AI? Talk about a fast-paced game. We've incorporated more video film elements to design the circuits in our goal chase. The faster your opponents run, the faster your efforts get less effective. Best defence wins in the end.**
- **AI is also a milestone in FIFA. 30 years ago, we introduced the first ever football game to have a professional AI crew. EA Sports Casual study, that's us. The AI's progression and development is making an impact in FIFA. We are more than realistic. The AI takes into account environments, teammate awareness and timings - now the player always understands what happens on the pitch. We make the game as authentic as we possibly can, and we are delighted to be providing our players and fans with the next-gen experience. There's more to come, of course. We are making decision making, like the commitment or timing of goals, testable and playable by the player in real-time.**
- **Pass The Paddle! The new pass system is the best it has ever been. You now have the ability to pass it exactly where you want to. The new pass maps are based on true**

**physics, allowing you to give a colleague a high pass in an entirely different location than previous games. This allows you to easily perform the right pass to improve your shooting accuracy, or cover more space. You can create your own pass guides by using tools in My Player**
