The game we have created is an action-platform game, in which the player can fly around the map, kill monsters and survive as long as possible! The game is made with the unity engine and platforms are Android and iOS. In the early 20th century, in the west of Africa in Angola. Several scientists launched an underground research, into which a mysterious creature was found, completely buried under the ground. The scientists had ordered a burial in the rock of the bottom of a special submarine, which was aimed at bringing up this creature. When the creature came up, the submarine exploded in an incredible disaster, where several scientists and engineers were killed. Now, 150 years later, a group of scientists find a sample of the creature, which was taken from this explosion. And these scientists decide to create a bomb, to make another attempt at bringing up the creature. After they made their bomb, a technical failure forced them to flee. Only one of them survived, making his way back to Europe. He is now working in the organization of this game, he can, as an official representative of this agency, travel to all corners of the world. Some of his missions are of high risk and are very dangerous, because they could endanger his life.

What's new in The Falconers: Moonlight:

was the strongest and best film of this year with powerhouse performances from Tom Hardy and Jessica Chastain. Moana was one of the best Disney live action films ever. The round-up: Jessica Chastain (The Tree of Life, Zero Dark Thirty, Big Fish), Tom Hardy (Locke, the Informer), Shia Labouf (The Dark Knight Rises, X-Men: First Class, Gangster Squad), Rihanna (Good Morning America, The Great Gatsby), Bill Nighy (Sherlock Holmes, Tinker Tailor Soldier Spy, The World's End), Khalil Kain (Resident Evil: Retribution, 3 Days, Second Best Exotic Marigold Hotel), Rosario Dawson (Justice League), Denzel Washington (Flight, Man on Fire), Dame Judi Dench (Skyfall, Notes on a Scandal, Skyfall), Isabelle Huppert (Elle, The Piano Teacher), Kirsten Dunst (On the Road, the Drop, Maggie's Plan), Alicia Vikander (A Royal Night Out, Tron: Legacy, Ex Machina), Kristen Stewart (Snow White and the Huntsman, On the Road, the Twilight Saga: New Moon), Johnny Depp (Alice in Wonderland, the Transformer series). Now Award: Daniel Day-Lewis for Lincoln. LACMA wins 10 out of the 13 Academy Awards. Beware of picky critics 1. Moonlight - Dazzling photographic accomplishment. Place André Aciman in your lifeboat and choose one dear friend to play off his left-field, overlapping, beautifully constructed (with every whisper), unsentimental, beautifully rendered attention to moviemaking (pun intended) and this is the end result. Surrounded by a cast of heavy hitters that included point-blank riffs on day laborers and trafficking, queer kids and polo players, Old and Full-of-Their-Gravity vs Young and Absorbing, these characters "feel" - in the sense that they're rendered and photographed and acted with a tactile aliveness, a physicality, a weight - and one gets more than a feeling, one gets a sense of self in the room, of what these characters were thinking, feeling, fighting for or against, or feeling in between. It's as lyrical, as precise a rendering of the quotidian as there is in cinema. Daniel Day-Lewis is an independent ballet, this picture I think, is the "black
