Several models of high-end FUJIFILM.Q: How to replace an array of string from a text file using python? i am trying to replace a character string within a text file using python. Basically, i want to replace commas within the text file, but not any commas that are in quotes or the begining of the line. I have tired the following code but it is not working. It works perfectly for replacing the commas inside quotes but the first and last commas are not being modified. Any ideas why this might be? f = open('text.txt') myfile = f.readlines() f.close() for i in myfile: if (myfile.find(',')!= -1): myfile[myfile.find(',')] = myfile[myfile.find(',')] + ',' print "it was replaced" A: You can use regex to match the commas that are preceded or followed by quotation marks. import re
