A mixture of action, RPG, and puzzle-solving, the game combines strategic spell casting with humorous character development and world exploration. While the game has been praised by media outlets, a small community of players has been working on making the game even more ambitious, and the result of their hard work will be released as the Odysseus Kosmos and the Robot Quest: The Need for Speed Saga. The bus route is the most important lifeline in Hamburg. It's the first thing you notice when you first step onto the bus. In the cityscapes of Hamburg, the first bus is something special - with your own eyes you can experience Hamburg with the bus. A realistic, sharp and detailed 3D bus interior is waiting for you. You can drive, watch the route on your control board or show the stops on the display panel. In addition to the real-time control, you can also step into the driver's seat and feel the special ambience, which is characteristic of Hamburg. The accurate recreation of Hamburg requires a lot of input from the bus driver, but of course, the bus is not just a toolbox. From real-time driving into a realistic cross-section of daily life to cityscapes with beautiful light effects: Hamburg Line 20 immerses you in everyday life in the city of Hamburg and makes you part of the best route. Already something of a Hamburg legend: the Hamburg 20 has traveled in the city since 1985. The route between the old station at Stahlförde and the new station at Altona has been extended. Hamburg Line 20 offers quick access to many important locations in the city and quickly drives past the countless sights of Hamburg. With the impressive historic centres of Hamburg-Harburg and Sternschanze and the thriving nightlife of the Reeperbahn, the new traffic route offers the best-value journey by bus in the city. The central city districts of St. Pauli, Spurenbereich and the area around the Rathaus are easily reached from the new route. In addition, you can travel from the new route by 20 towards the beach and the party district of Blankenese, the Anhalter Bahnhof in central Altona and via Altona to the trade fairgrounds of Rödersdal and beyond to the airport with just one bus line. In the morning you can easily reach the central neighbourhood of St. Pauli with an early start, the cultural areas of Schanzenviertel or the party district of Kiez West, or visit the city's most picturesque historic centre at Sternschanze. In the evening, the route leads to the lively nightlife of Gärtnerstraße and the station area of Winterhude Markt or to the first district of the city centre in a new direction, as St. Pauli and the historic marketplaces
