18 Wos Haulin Otobus Mod 5.9

Link: YokluKanalÄ±ma abone olmayÄ± ve beÄŸeni atmayÄ±Ä± .Spurred by the iPad 2, Sony announced a variety of new products at CES 2010, including the PlayStation 3 (PS3) Tablet (\$249) and the PlayStation Portable (PSP) Handheld (\$99.99). The PS3 Tablet is expected to ship in the U.S. in March for \$199 and, at launch, it will be available in either Wi-Fi or 3G connectivity and will run Android 2.1 for gaming on XDCAM HD content. The PlayStation Portable will also ship in March for \$149 and will have been upgraded to Android 2.2. In addition to announcing a variety of hardware, Sony also announced plans for a second version of the PS Vita -- the HD PlayStation Vita (\$249.99) -- that will feature a dual-core processor and be able to access the PlayStation Store. The new PS3 Tablet and the upgraded PSP are part of Sony's strategy to get out of the hardware business. Early next year, Sony will begin selling the PS Vita with the intention of turning it into a "wallet player" that can be used as a portable game console, device dock, and game companion. When it comes to games, the PS Vita is being positioned as a handheld that will play 1080p HD games, as well as PS3 and PSP games.Sony will roll out 10 full games at launch, which will include several of the big titles from Sony's PS3 lineup, including Borderlands (Borderlands' sequel), The Last of Us, and Killzone.

The company says it will also be working with a variety of "major third-party developers" to release more content in the months and years after launch. The Vita will be able to charge other devices, such as the Xbox 360, via a USB port as well as use the PlayStation Store. However, Sony says it plans to eventually move to an in-game-interface system, similar to how things work on the PlayStation Mobile platform. Though Sony doesn't have specific release dates for the Vita, it plans to launch before the end of the year and to ship about a month later.--thickness-ratio
