and much more. Why not admit to me what
you are? I will immediately be freed. They are
all like this. You can get them all in, and then
you'll be able to download this one instead. .

@providesModule getIteratorFn * @flow */ /**

* The iterator is an object that provides a
current position and the next() * and
previous() methods. Iteration begins at the
first element in the collection. */ function
getIteratorFn(): IterableIterator { return {
next(): void { return { position: this.index,
done: false }; }, previous(): void { return {
position: this.index - 1, done: false }; } } }

module.exports = getIteratorFn; Estimated life-sustaining treatment refusal rates in the United States. Unjustified life-sustaining treatment (ULST) refusal (eg, refusing intensive care or long-term care) results in avoidable suffering and death and is a violation of patient autonomy. Research suggests that in the United States, ULST refusal rates are alarmingly high. Anecdotal reports suggest that even among health care providers, knowledge of, and intentions to refuse ULST is fragmented. We estimate ULST refusal rates for hospitalized patients as well as for the general US population from existing data. The estimated refusal rates for the United States (2010) are 23% (intensive care) and 15% (long-term care). To examine the patterns of ULST refusal in a single hospital, data from a single hospital system were used. At this hospital, patients with an expected intensive care prognosis (N = 575) refused life-sustaining treatment at rates of 8% (withdrawal of dialysis c6a93da74d
