Q: Regular Expression that removes numbers that are in a certain position I need to create a Regular Expression that takes the name of a file and removes all characters between a certain point (in this case the number 5) and after the number. This is the example of what it should look like: 5-5L.wld 5-22C.wld 5-12E.wld 5-6C.wld 13-6L.wld 5-6E.wld This is what I tried so far: `^[5]$` It removes only the 5 and the number after it in every case, since there is no matching group. A: You have to make `[5]` into `(\\d{3})`, and add `a?` after the number. `^[5](\\d{3})?a?` Q: What is the relationship between the various tech diets? Here's a list of what I take to be some of the major technology diets: c6a93da74d
