Sheridan Active Threed Plus 30110

2018 I'm working on this same data set and am starting to run in to the same problem. I have been through the following solutions with no luck. paste -d " in your code sed -e's/ //g' I've tried including the newlines inside the data file also. datafile.dat 1 2 29 30 32 I've tried to use the next function on the solution above. > wget " -O - -q -t 1 -N > read.table('/Users/myuser/Downloads/dbar_theta.R', hlines=F) Error: unexpected ',' in "read.table ("/Users/myuser/Downloads/dbar_theta.R", : "," 1," cannot appear at the start of a string What am I doing wrong? Thanks in advance! UPDATE Thanks

for the suggestions, I've adjusted the code and tried the commands and it works now.

(1,2,29,30,32) datafile.dat 1 2 29 30 32 A: If you have a few empty records (empty lines/paragraphs) that breaks the file read and create a problem, you can remove them by searching from 1 (the first line) to the last line (number of lines), the regex is the same for the number of spaces or tabs (as you say in your comment). Here a solution (using R-like regmatches and regexpr functions). In step 1, I'll create a list of empty lines I want to remove. r
