### **AAct 3.1 Portable (Windows Office Activator)**

Launch with administrator rights, go to "AAct Portable" and in the window that opens, click the "Activate Office" button. In a minute, you will activate Office. You can work, but only offline. In Windows 7 and Windows 8, another activator is used for this - AAact. But it doesn't work under Windows XP, so it needs another activation method. How to find it? Open the C:\\Windows\\Installer\\AAact.exe folder and run as administrator. After that, enter the name of the application in the Autorun field. After that click Start. Next, enter the product name in the Product Key field and click the Activate button.
