The easiest way to create custom projects is to use AutoLISP, which is a language that is similar to BASIC. AutoLISP is created using ObjectARX and is used for customization. AutoLISP is primarily used for customization, such as creating user defined commands (UDFs). Automation is achieved through Visual LISP, Visual Basic for Applications (VBA), and .NET language. These are used for automation of various processes or tasks. VBA is designed for Microsoft Office, Microsoft Office for Mac, and Windows only. What's New in the AutoCAD?

Create temporary blocks in your drawing using the Markup menu. This is useful for maintaining ancillary lines and details in your drawing, or when you want to preserve an edit for easy and quick viewing. Add a block to a drawing with the Markup Assist menu. This tool allows you to quickly import blocks from AutoCAD's document templates. It works with Revit drawings as well. Improved compatibility with Revit, Revit MEP, and Revit Architecture. More than 75 new features. Automatic generation of AutoCAD Extended Keywords. See the AutoCAD 2023 Keywords help file for details. Dynamically generated keywords are now linked to drawing and drawing template options. (Dynamically generated keywords are those that you define in the drawing or in a drawing template.) This allows you to view the use of a keyword in the drawing. Access to the complete function and option lists of the most recent release of AutoCAD through a configurable browser-based tool. Click "Extended" in the Options menu, and then choose a "View All" option from the menu. In the resulting dialog box, select "Function list," "Options list," or "Keyword list" and then click "OK." (The "Extended Function List" tool is designed to help you learn how to use AutoCAD.) Save the drawing with the last change to the acad.xml file. It's possible to recover previous versions of the drawing to make changes and then save it again. Recover an image from the entire drawing file. If an image includes drawing elements that are not visible in the current viewport, the image can be recovered to display the entire drawing. Improved performance. New features in AutoCAD 2020 Raster to Vector: Draw vector objects that can be edited directly using the Brush tool, but can also be edited with raster-based methods. Create vector-based blocks that can be edited with raster-based methods. Paint like a raster artist: Draw with the Pen tool, paint with the Paint Bucket tool, and select with the Lasso tool. Use the Brush tool to apply custom fills and strokes and the Watercolor tool for dynamic painting. Draw a vector shape with the Size tool
