FULL Segundo Curso De Contabilidad Elias Lara Flores: A Comprehensive Guide to Accounting

Accounting is the language of business, and it is essential for anyone who wants to understand how a company operates and makes decisions. Accounting involves recording, summarizing, analyzing, and communicating financial information about a business or an organization. Accounting can be divided into different branches, such as financial accounting, managerial accounting, cost accounting, tax accounting, auditing, and accounting information systems. One of the most popular and widely used textbooks for learning accounting is **FULL Segundo Curso De Contabilidad Elias Lara Flores**, written by Elias Lara Flores, a renowned Mexican accountant and professor. This book is the second course of a series of three books that cover the basic concepts and principles of accounting, as well as the practical applications and exercises. The book includes the following topics:

- The accounting equation and the balance sheet
- The income statement and the statement of cash flows
- The accounting cycle and the journal entries
- The adjusting entries and the closing entries
- The bank reconciliation and the petty cash
- The accounts receivable and the allowance method
- The inventory and the cost of goods sold
- The fixed assets and the depreciation methods
- The liabilities and the interest calculation
- The equity and the dividends
- The value added tax (IVA) and its accounting treatment
- The financial statements analysis and ratios

The book is written in a clear and concise language, with examples, diagrams, tables, charts, and formulas that help the reader to understand the accounting concepts and procedures. The book also contains numerous exercises and problems that test the reader's knowledge and skills. The book is suitable for students, teachers, professionals, and anyone who wants to learn more about accounting. **FULL Segundo Curso De Contabilidad Elias Lara Flores** is available in print and digital formats. You can find it online at [Amazon.com](#)^[4], [Google Books](#)^[1], or [Tuxdoc.com](#)^[2].
