i'm trying to get my old copy of worms 3d running on my new laptop (Windows 10) but it doesn't seem

to work properly - mostly the mouse doesn't respond properly and menu options flit rapidly between each other as though the mouse is trying to highlight all of them at once. I'm a complete idiot with modding, etc, just a user who loves this game.

Can anyone tell me if it is in fact possible to run Worms 3d properly on Win10, and can anyone kindly help me find out how to get it to do so? **Worms 3D** is a turn-based military strategy game developed by Team 17 and that stars the famous worms of this well-known video game saga. It was the first title presented in 3D, although that's the only true innovation of this new installment. **It comes along with all the weapons you can imagine**, both new ones and others from previous Worms titles. Your goal is to wipe out your rival team using all the heavy artillery available. The game can be **downloaded for Mac OS X 10.2** or above. The minimum requirements to play **Worms 3D** are to have an Intel or PPC processor at 600 MHz, 256 MB of RAM and a graphics card with 32 MB of RAM. The game also includes a multiplayer mode, as well as the possibility to edit and create teams. **The campaign includes 35 missions** in which the player has to use all his worms to complete a certain task, such as destroying enemy worms, collecting a box or other unique missions.
