

# **How to Use TinaSoft EasyCafe 2.2.14 for Windows**

TinaSoft EasyCafe is a software that allows you to manage your own Internet cafe. It lets you control the time and bandwidth usage of your clients, monitor their activities, generate reports, and more. In this article, we will show you how to use TinaSoft EasyCafe 2.2.14 for Windows, which is the latest version available as of September 2021.

## **Step 1: Download and Install TinaSoft EasyCafe**

To download TinaSoft EasyCafe 2.2.14 for Windows, you can visit the official website of [tinasoft](#) or use a trusted third-party source like [filehippo.com](#). The file size is about 11 MB and the installation process is simple and fast. You will need a license key to activate the software, which you can purchase from [tinasoft](#) or get a free trial for 15 days.

## **Step 2: Configure the Server and Clients**

After installing TinaSoft EasyCafe, you need to configure the server and clients on your network. The server is the computer that runs the software and controls the clients, which are the computers that your customers use. You can use any number of clients with one server, as long as they are connected to the same local area network (LAN). To configure the server, you need to run the EasyCafe Server application and enter your license key. Then, you can set up your preferences, such as the currency, language, pricing, security, etc. You can also create accounts for your staff and customers, and assign them different privileges and restrictions. To configure the clients, you need to run the EasyCafe Client application on each client computer and enter the IP address of the server. Then, you can customize the appearance and functionality of the client interface, such as the wallpaper, icons, menus, etc. You can also enable or disable features like chat, games, web browser, etc.

## **Step 3: Manage Your Internet Cafe**

Once you have configured the server and clients, you can start managing your Internet cafe with TinaSoft EasyCafe. You can use the EasyCafe Server application to monitor and control the clients remotely, such as starting or stopping sessions, locking or unlocking screens, sending messages or commands, etc. You can also view detailed information about each client, such as the user name, time left, money spent, etc. You can also use TinaSoft EasyCafe to generate reports and statistics about your Internet cafe business, such as the income, expenses, usage, etc. You can export or print these reports for your records or analysis. You can also backup or restore your data in case of any problems.

## **Conclusion**

TinaSoft EasyCafe is a powerful and easy-to-use software that helps you manage your own Internet

cafe. It offers many features and options that allow you to control your clients, monitor your business, and optimize your profits. You can download TinaSoft EasyCafe 2.2.14 for Windows from [tinasoft](#) or [filehippo.com](#) and try it for free for 15 days.
