## Music Call Player APK: How to Listen to Music During Phone Calls

Do you love listening to music on your Android device? Do you wish you could enjoy your favorite tunes while talking on the phone? If so, you might want to try Music Call Player APK, an app that lets you listen and control your music during phone calls. In this article, we will tell you what Music Call Player APK is, how to download and install it, how to use it, and what are its pros and cons.

### What is Music Call Player APK?

Music Call Player APK is an Android app that allows you to listen and control your music during phone calls. Only you can hear your music, so you don't have to worry about disturbing the other person or missing important information. You can also pause, resume, skip, or change the volume of your music with simple gestures or buttons. Music Call Player APK supports outgoing and incoming calls, and works with most music apps, such as Spotify, YouTube, SoundCloud, etc. It also has Android Wear support, so you can control your music from your smartwatch.

### Features of Music Call Player APK

Some of the features of Music Call Player APK are:

- Listen and control your music during phone calls
- Only you can hear your music
- Supports outgoing and incoming calls
- Works with most music apps
- Has Android Wear support
- Easy to use and customize

### How to Download and Install Music Call Player APK

To download and install Music Call Player APK on your Android device, follow these steps:

1. Go to [Music Call Player APK (Android App) - Free Download - APKCombo](^1^) or [Music

Call Player - Android App - Free APK Download - AppBrain](^2^) and download the latest version of the app.

2. Open the downloaded file and tap on Install.
3. If prompted, allow the app to access your phone and media.
4. Wait for the installation to finish.
5. Launch the app and grant any necessary permissions.
6. Enjoy listening to music during phone calls!

## How to Use Music Call Player APK

To use Music Call Player APK, you need to have a music app running in the background. Then, you can use the following methods to control your music during phone calls:

### Outgoing Calls

If you make an outgoing call while listening to music, the app will automatically pause your music and show a notification with buttons to resume, skip, or change the volume of your music. You can also swipe left or right on the notification to skip tracks, or swipe up or down to adjust the volume. Alternatively, you can use the buttons on your headset or earphones to control your music.

### Incoming Calls

If you receive an incoming call while listening to music, the app will automatically lower the volume of your music and show a notification with buttons to pause, resume, skip, or change the volume of your music. You can also swipe left or right on the notification to skip tracks, or swipe up or down to adjust the volume. Alternatively, you can use the buttons on your headset or earphones to control your music.

### Android Wear Support

If you have an Android Wear device connected to your phone, you can also control your music from your wrist. You can tap on the Music Call Player icon on your watch to open the app, and then use the buttons or gestures to pause, resume, skip, or change the volume of your music.

## Pros and Cons of Music Call Player APK

Music Call Player APK is a useful app for music lovers who want to listen to music during phone calls. However, it also has some drawbacks that you should be aware of. Here are some of the pros and cons of Music Call Player APK:

### Pros

- **Control your music easily**

You can control your music with simple buttons, gestures, or headset commands. You don't have to switch between apps or interrupt your phone call to enjoy your music.

- **Only you can hear your music**

Your music is played through your earpiece, so only you can hear it. You don't have to worry

about disturbing the other person or missing important information. You can also adjust the volume of your music and voice separately.

- **Compatible with most music apps**

Music Call Player APK works with most music apps, such as Spotify, YouTube, SoundCloud, etc. You can listen to any music you want during phone calls.

## Cons

- **Requires permissions to access phone and media**

To function properly, Music Call Player APK needs permissions to access your phone and media. This means that the app can read your phone state, contacts, call logs, and media files. Some users may not feel comfortable granting these permissions to a third-party app.

- **May not work on some devices or Android versions**

Music Call Player APK may not be compatible with some devices or Android versions. Some users have reported that the app does not work on their phones, or causes glitches or crashes. The app may also interfere with other apps or functions on your device.

- **May drain battery or cause overheating**

Music Call Player APK may consume more battery power or cause your device to overheat. This is because the app runs in the background and uses your earpiece speaker to play music. You may want to monitor your battery level and device temperature while using the app.

## Conclusion

Music Call Player APK is an app that lets you listen and control your music during phone calls. It has many features and benefits, but also some drawbacks and risks. You should weigh the pros and cons before downloading and installing the app on your device. If you decide to try it, you can download it from [Music Call Player APK (Android App) - Free Download - APKCombo] or [Music Call Player - Android App - Free APK Download - AppBrain]. We hope this article has helped you learn more about Music Call Player APK and how to use it.

## FAQs

1. **What is Music Call Player APK?**

Music Call Player APK is an Android app that allows you to listen and control your music during phone calls.
