Sale System (POS) with C Full Source Code 8.4 for your business.

# Features of Advance Point of Sale System (POS) with C Full Source Code 8.4

Advance Point of Sale System (POS) with C Full Source Code 8.4 has many features that can help you manage your sales, inventory, customers, suppliers, expenses, reports and more. Some of the features are:

- **Sales Register**: You can easily add items to the sales register using a barcode scanner or manual input. You can also apply discounts, taxes, gift cards and other options to the sales transactions. You can print receipts or invoices using a direct print option or a crystal report option. You can also view the sales history and return items if needed.
- **Quick Sale**: You can use this feature to make a fast and simple sale without adding customer or supplier information. You can also use this feature for restaurant orders with a kitchen display option.
- **Inventory**: You can manage your inventory items by adding, editing or deleting them from the database. You can also use a barcode creator feature to generate barcodes for your items. You can view the stock levels, purchase history and sales history of your items.
- **Customers and Suppliers**: You can add, edit or delete customer and supplier information from the database. You can also view their purchase history, due payments and payment history.
- **Expenses**: You can record and track your business expenses using this feature. You can also view the expenses graph and report.
- **Reports**: You can generate various reports for your business using this feature. You can view the sales report, payment report, profit/loss report, summary report, top sales chart and more. You can also export the reports to Excel or PDF formats.
- **Data Backup and Restore**: You can backup and restore your data using this feature. You can also reset your data if needed.
- **User Management**: You can add, edit or delete users from the system. You can also assign different roles and permissions to the users.
- **System Configuration**: You can configure various settings for your system such as currency, date format, receipt format, barcode format, etc.

# Benefits of Using Advance Point of Sale System (POS) with C Full Source Code 8.4 for Your Business
