# How to Update Your Starsat Receiver Software

Starsat is a leading brand of satellite receivers that offer a wide range of features and functions. Whether you want to watch HD channels, access IPTV services, or enjoy multimedia content, Starsat has a receiver for you. But to get the best performance and user experience, you need to keep your Starsat receiver software updated.

Updating your Starsat receiver software can help you fix bugs, improve stability, add new features, and enhance compatibility with different devices and platforms. In this article, we will show you how to update your Starsat receiver software easily and safely.

## What You Need to Update Your Starsat Receiver Software

Before you start the update process, you need to have the following things ready:

- A USB flash drive with at least 4 GB of free space.
- A computer with an internet connection.
- A compatible Starsat receiver model.
- A TV or monitor connected to your Starsat receiver.
- A remote control for your Starsat receiver.

## How to Download the Latest Starsat Receiver Software

The first step to update your Starsat receiver software is to download the latest version from the official website. Here are the steps to follow:

1. Go to <http://www.cwdw.net/>, which is the official website of Starsat.
2. Select your Starsat receiver model from the list of products on the left side of the page.
3. Click on the "Software Downloads" link on the right side of the page.
4. Find the latest software version for your Starsat receiver model and click on the "Download" button.
5. Save the file to your computer and unzip it if necessary.
6. Copy the file to your USB flash drive and make sure it is the only file on it.

## How to Install the Latest Starsat Receiver Software

The second step to update your Starsat receiver software is to install it on your device. Here are the steps to follow:

1. Turn off your Starsat receiver and disconnect it from the power source.
2. Insert your USB flash drive into one of the USB ports on your Starsat receiver.
3. Reconnect your Starsat receiver to the power source and turn it on.
4. Wait for a few seconds until you see a message on your TV screen that says "USB Upgrade".
5. Press OK on your remote control to start the update process.
6. Wait for a few minutes until you see a message on your TV screen that says "Upgrade Finished".
7. Press OK on your remote control to restart your Starsat receiver.
8. Remove your USB flash drive from your Starsat receiver.

# How to Check Your Starsat Receiver Software Version

The final step to update your Starsat receiver software is to check if it was successful. Here are the steps to follow:

1. Turn on your Starsat receiver and press MENU on your remote control.
2. Select SYSTEM SETTINGS and press OK.
3. Select SYSTEM INFORMATION and press OK.
4. Check the SOFTWARE VERSION number on the screen and compare it with the one you downloaded from the website.
5. If they match, congratulations! You have successfully updated your Starsat receiver software. If they don't match, try repeating the steps above or contact customer support for assistance.
