Graitec Arche OMD 2009 Friso

Graitec Arche OMD 2009 Friso: A Software for Structural Analysis and Design

Graitec Arche OMD 2009 Friso is a software that allows users to perform structural analysis and design of buildings composed of slabs, beams, columns, walls and foundations. It is based on a 3D model of the building and automatically produces all the reinforcement plans. Graitec Arche OMD 2009 Friso is part of the Graitec Advance suite, which also includes software for steel, concrete and wood structures, as well as BIM and CAD tools.

Graitec Arche OMD 2009 Friso is compatible with Windows XP, Vista and 7, and requires a minimum of 512 MB of RAM and 1 GB of disk space. It can be downloaded from various online sources, such as jemi.so[1], kit.co[2] and soundcloud.com[3] [4]. However, users should be aware that these sources may not be official or authorized by Graitec, and may contain viruses or malware. Users should always verify the authenticity and safety of the software before downloading and installing it.

Graitec Arche OMD 2009 Friso is a powerful and user-friendly software that can help engineers and architects to design safe and efficient buildings. It has many features and options that allow users to customize their projects according to their needs and preferences. Some of the features include:

- Automatic generation of reinforcement plans for slabs, beams, columns, walls and foundations
- Calculation of loads, reactions, displacements, stresses and strains
- Verification of stability, serviceability and ultimate limit states
- Optimization of reinforcement quantities and costs
- Integration with other Graitec Advance software for steel, concrete and wood structures
- Export of results to BIM and CAD formats

Graitec Arche OMD 2009 Friso is a software that can help users to create high-quality structural designs in a fast and easy way. It is suitable for both simple and complex projects, and can handle various types of materials and geometries. Users can benefit from the experience and expertise of Graitec, a leading company in the field of structural engineering software.

Graitec Arche OMD 2009 Friso has received positive feedback from many users who have used it for their structural design projects. Some of the advantages that users have highlighted are:

- The software is easy to use and intuitive, with a clear and simple interface
- The software is fast and reliable, with accurate and consistent results
- The software is flexible and adaptable, with various options and settings to suit different needs and preferences
- The software is compatible and interoperable, with seamless integration with other Graitec Advance software and export to BIM and CAD formats
- The software is comprehensive and complete, with all the necessary features and tools for structural analysis and design

Some of the examples of projects that users have successfully completed with Graitec Arche OMD 2009 Friso are:

- A villa with slabs, beams, columns and foundations
- A building with slabs, beams, columns, walls and foundations
- A swimming pool with slabs, beams, columns and foundations

- A reinforced concrete frame with slabs, beams, columns and foundations
- A foundation slab with reinforcement

Graitec Arche OMD 2009 Friso is a software that has proven to be effective and efficient for structural analysis and design. It has helped many users to achieve their goals and objectives in a fast and easy way. It has also helped them to save time and money by optimizing their designs and reducing their costs. Graitec Arche OMD 2009 Friso is a software that can be trusted and recommended by many professionals in the field of structural engineering.
